

GAMING MEMORY

CRUCIAL BALLISTIX MAX

Legendary Parts for Legendary Wins

Our next generation of Crucial Ballistix memory sets the standard for extreme performance with legendary Micron die to deliver high speeds and low latencies. Engineered for the latest AMD and Intel platforms, Crucial Ballistix memory includes XMP 2.0 support for overclocking and RGB options for rig customization.

Best For

Extreme-performance gaming-grade memory for workstations

Key Features

- 16GB, 8GB
- Speed up to 5100MT/s
- DDR4 UDIMM
- RGB option: 8 zones with 16 LEDs
- M.O.D. Utility software
- Limited lifetime warranty¹

Extreme Domination

Designed for extreme overclocking² enthusiasts to get that extra edge in game or blow away world-record speeds.

Engineered Design

High-quality aluminum heat spreaders provide max heat dissipation while precision temp sensors monitor thermals as you push performance thresholds.

Extensive Compatibility

Our engineers work with AMD and Intel, as well as motherboard designers and system builders, to ensure our memory is optimized for high performance.

Precision Parts

As the manufacturer of memory components, we do more than bin parts. We optimize performance at the die level.

Ultimate Mod (Crucial Ballistix Max RGB)

Create your own custom light bar with a 3D printer and provided 3D files. Control light pattern and brightness via software utilities.

Crucial® Ballistix® Max Gaming Memory

	Crucial Ballistix Max	Crucial Ballistix Max RGB
Form Factor	UDIMM	UDIMM
Speed	4000MT/s, 4400MT/s	4000MT/s, 4400MT/s
Module Density (kit)	16GB (8GBx2) 32GB (16GBx2)	16GB (8GBx2) 32GB (16GBx2)
Colour options	Black	Black
RGB LEDs	No	Yes

1. Limited lifetime warranty valid everywhere except Germany, where warranty is valid for 10 years from date of purchase.

2. Altering clock frequency or voltage may result in damage to computer components, and Micron disclaims any and all liability for such damage.
